Education

Master of Computer Applications (MCA) Vellore Institute of Technology	2025 – Present GPA: 9.06
Bachelor of Science, Computer Science (Honours) University of Calcutta	2022 – 2025 CGPA: 8.225

Experience

Data Analyst Intern Bluestock Fintech Internship (Remote)	Jun 2026 – Present
- Developed an end-to-end mutual fund analytics platform using Python, SQL (PostgreSQL), Power BI, and Excel to analyze financial data and investor trends. - Built ETL pipelines, performed data extraction, cleaning, validation, feature engineering, and exploratory data analysis (EDA) on large financial datasets. - Designed interactive Power BI dashboards, generated KPI reports, and delivered data-driven insights to support business decision-making and investment analysis.	

Technical Skills

Programming Languages: Python
Databases: SQL (PostgreSQL, MySQL), MongoDB
Data Engineering: ETL, Data Validation, Data Modeling
Data Visualization: Microsoft Power BI, Matplotlib, Seaborn
Data Processing: Data Cleaning, Data Wrangling, Power Query
Libraries: Pandas, NumPy, Scikit-learn
Data Analysis: Exploratory Data Analysis (EDA), Statistics, Regression Analysis
Tools: Microsoft Excel (Pivot Tables, VLOOKUP), Jupyter Notebook, Streamlit
Version Control: Git, GitHub
Other: Dashboard Development, KPI Reporting

Projects

- Link Prediction in Temporal Graph** Jan 2025 – Jun 2025
Developed a temporal graph link prediction system using heuristic methods (Temporal Common Neighbors) and supervised machine learning (Logistic Regression) to predict future interactions in dynamic networks. Engineered graph-based features including node degree, common neighbors, historical interactions, and temporal recency, and evaluated model performance against heuristic approaches.
Technologies: Python, Pandas, NumPy, Scikit-learn, NetworkX
Machine Learning Model: Logistic Regression
- Airbnb Market Intelligence: Price Prediction & Business Intelligence Dashboard** Jun 2026
Developed an end-to-end data analytics platform to analyze Airbnb listings across 10 cities using Python, PostgreSQL, Power BI, and Machine Learning. Built an ETL pipeline for data cleaning, preprocessing, feature engineering, and exploratory data analysis (EDA). Designed interactive Power BI dashboards to visualize pricing trends, executive KPIs, room type distribution, review analytics, and city-wise insights. Trained and evaluated a Random Forest Regressor for Airbnb price prediction and exported the model for deployment.
Technologies: Python, PostgreSQL, Pandas, NumPy, Scikit-learn, Power BI, Git, Jupyter Notebook
Machine Learning Model: Random Forest Regressor

Certifications

- Power BI Fundamentals** – Corporate Finance Institute [\[Link\]](#)
- IBM Data Science Professional Certificate** – IBM [\[Link\]](#)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle
